SOLID-TRANS PISTON PUMP

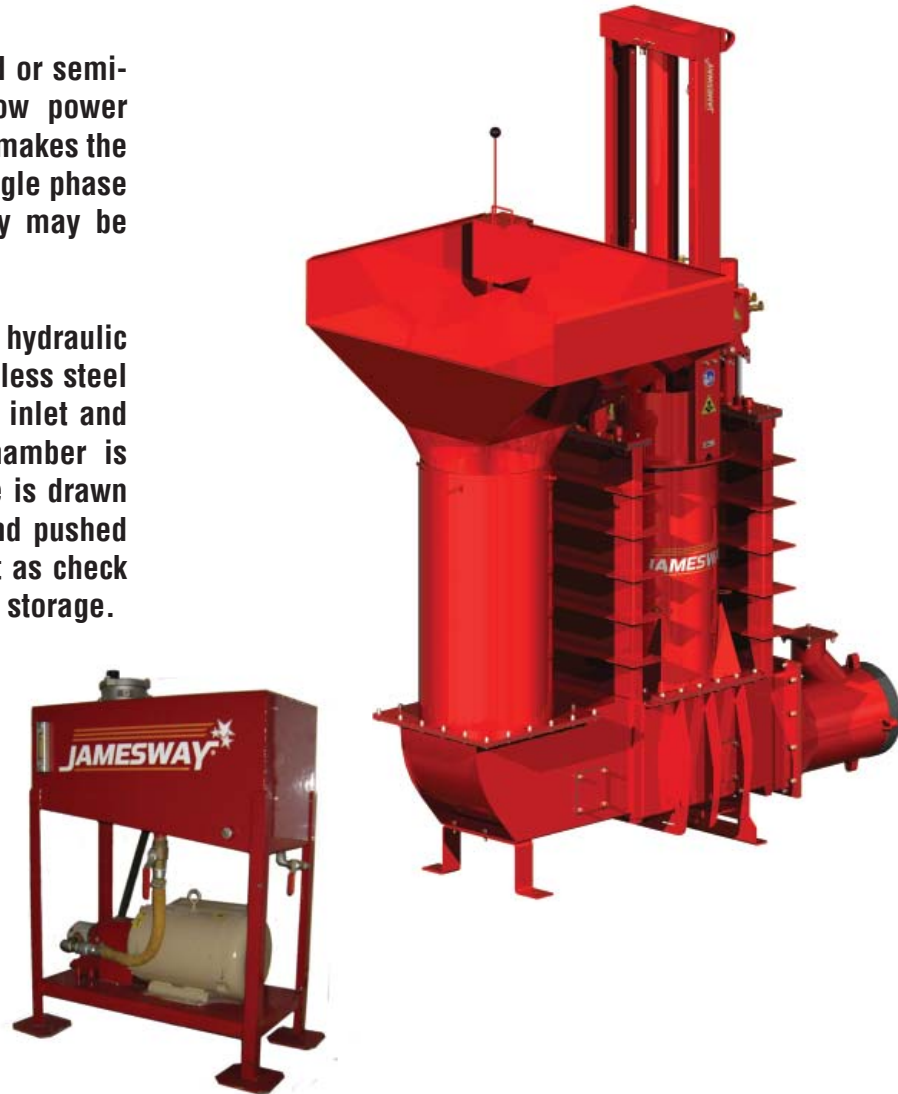

The Solid-Trans is capable of transferring solid or semi-solid bedded manure long distances with low power requirements. The 7.5HP hydraulic power unit makes the Solid-Trans an excellent choice for use with single phase electricity or anywhere that power availability may be limited.

The Solid-Trans pump is equipped with a 5" hydraulic cylinder and a heavy gauge 20" diameter stainless steel pumping cylinder. The Solid-Trans has a 20" inlet and a 16" diameter outlet, and the pumping chamber is equipped with heavy guillotine doors. Manure is drawn into the pump chamber during the upstroke and pushed out during the downstroke. The guillotines act as check valves so that manure may only flow toward the storage.

Solid-Trans pumps are mounted in a dry pit and are equipped with a hopper inlet. The output is 16" diameter SDR26 PVC pipe. Steel 16" pipe is also available.

Visit our website for more information on these Jamesway products!

MANURE SYSTEMS:

- Alley Scrapers
- Vertical Electric Pumps
- Electric Prop Agitators
- Vertical PTO Pumps
- Piston Transfer Pumps
- Cross Gutter Systems
- Barn Cleaners

MANURE APPLICATION:

- Non-Steer Spreader Tanks
- Steerable Spreader Tanks
- Injection Systems
- Truck Mount Tankers
- Lagoon Pumps
- Prop Agitators
- Loading Pumps

FEEDING SYSTEMS:

- Silo Unloaders
- Feeders
- Conveyors
- Hammer Mills
- Power Feed Carts
- Bedding Choppers
- Automatic Batch Systems

Jamesway Farm Equipment products are designed in conformance to ASAE Standards S354.4 "Safety for Farmstead Equipment" and S318.15 "Safety for Agricultural Equipment". Some photos in this brochure have safety shields removed or open to show additional detail on equipment features. Never operate equipment without safety shields in place. Jamesway continually updates and improves products and reserves the right to make changes in the design, specifications, and to add improvements to our products, without incurring an obligation on equipment purchased.
